DETAILED ACTION

Allowable Subject Matter

1. Claims 2-7, 10-14 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. although the prior art of record discloses a memory transistor and a switch transistor share a common floating gate having only two operating modes: writing and erase, but there is no third operating mode, with respect to claims 4 and 10, in addition to other limitations in the claims, the prior fails to teach, disclose, or render obvious the applicant's invention as claimed, particularly the feature describing:

-wherein said body accommodates a first and a second active area separated by an insulating region, said common-gate regions extending in a direction transverse to, and on top of, said first and second active areas, said first active area forming said first and second conduction regions of said memory element, and said second active area forming said first and second conduction regions of said pass transistor.

-leaving said first conduction region of said memory element floating, applying a reference potential to said second conduction region of said memory element, applying a sixth potential to said common control gate region of said memory element and said pass transistor, and detecting possible data on an output terminal of said pass transistor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
